Bill,

I'm fine with all of Fran's edits. Yes, please move the FAQs as needed. We are working on them, but I wouldn't say that they will be ready soon.

You have the correct USGS document.

Let's chat about the documents.

Thanks!

Cynthia, I'm okay with all of Fran's minor changes and don't think they warrant further review beyond your concurrence. Two items I would like your agreement on, though:

1. The first paragraph of Community Involvement is not the approved boilerplate language. We plan to replace that.
2. The FAQ section needs to be moved up, perhaps to right after Site Documents. Are you working on these questions and answers—will they be ready soon?

What about the rest of the documents--are they near ready? And please see the link I put beside the USGS doc and confirm that is the one you want to link to.

Thanks

Subject: Upper Animas

Hi Bill. Attached please find my comments on the Upper Animas site. I agree with you about the passive voice, however, I couldn't change most of it since I don't know who actually did the work. I suspect it may have been multiple parties.

Also, Steve told me that he and Richard Sisk reviewed and commented on this. I suspect one of them didn't realize there was boilerplate language and changed it.

I'm in R3 and connected to the EPA internet if you have questions. Thanks!

Fran
